ABOUT ME

I am a **Master of Architecture graduate** from the **University of Waterloo** with experience across architectural practice, research, and professional outreach. I have worked at firms in Canada and abroad, where I used **Revit**, **Rhino**, and **Adobe Creative Suite** to create architectural drawings, produce visualizations, and contribute to projects from conceptual designs to masterplans to construction details. I am passionate about sustainable, excellent, uplifting design—my thesis explored flood resilience and climate adaptation, and was recognized with the OAA Scholarship for Exceptional Leadership Through Design Excellence. My experience in research project coordination has given me strong problem-solving and organization skills, and my work in outreach has strengthened my ability to collaborate and communicate effectively. Now, I am eager to build on my experience in practice, grow as a designer, and work toward architectural licensure.

EDUCATION

University of Waterloo, School of Architecture

Cambridge, ON

Master of Architecture

Sep 2023 – Apr 2025

- Canada Graduate Scholarship (SSHRC), OAA Scholarship for Exceptional Leadership Through Design Excellence
- Thesis: Facing the Flood — Proposed flood adaptive retrofits to improve climate resilience

University of Waterloo, School of Architecture

Cambridge, ON

Bachelor of Architectural Studies

Sep 2018 – Aug 2023

- Graduated Dean's Honours List with Distinction

SKILLS AND QUALIFICATIONS

- **Software:** Revit, AutoCAD, Bluebeam Revu, Rhino, SketchUp, Grasshopper
- **Visualization:** Illustrator, Photoshop, Hand Sketching, Architectural Rendering (Enscape, V-Ray)
- Registered as an **Intern Architect** with the Ontario Association of Architects (OAA)
- Strong **visual and written communication skills**
- Ontario Full G Driver's License
- **Highly organized**, with experience coordinating projects and managing multiple priorities

WORK EXPERIENCE

Ontario Association of Architects

Toronto, ON

Architectural Graduate

Jun 2025 - Jun 2026

- Developed a broad understanding of architectural practice in Ontario through a full time, one-year staff position at the Ontario Association of Architects
- Supported professional initiatives, practice resources, committees, and events, gaining insight into the standards and responsibilities of architectural work
- Contributed written and visual content to OAA communications, supported an energy-efficiency audit of the OAA headquarters

WORK EXPERIENCE cont.

W X Y architecture + urban design

New York, USA

Architectural Intern, Co-op

Jan 2023 - Apr 2023

- Developed Rhino and Revit models for the adaptive reuse of the Jones Beach Bathhouse, integrating new program and service spaces within an existing heritage recreation complex
- Produced design development drawings, diagrams, 3D visualizations, and client presentation materials

D'Ambrosio architecture + urbanism

Victoria, BC

Architectural Intern, Co-op

Jan 2022 - Aug 2022

- Created diagrams, massing studies, and physical models for a master planning project containing several mid-rise and high-rise mixed use buildings
- Assisted in producing Revit design development drawings for a transportation project
- Created as-built drawings and documented existing conditions for an energy-efficiency retrofit study of a heritage institutional building, including participating in site visits

IBI Group

Etobicoke, ON

Architectural Intern, Co-op

May 2021 - Aug 2021

- Produced architectural drawings in Revit for accessibility retrofits of various City of Toronto buildings, including fire halls, libraries, and municipal offices, ensuring compliance with Accessibility Design Guidelines
- Collaborated with in-house engineers to coordinate architectural and mechanical details
- Used Bluebeam Revu to note changes and drawing updates

Fryett Turner Architects

Elora, ON

Architectural Intern, Co-op

Sep 2020 - Dec 2020

- Developed Revit drawings for mid-rise residential and mixed-use projects through various stages of design

Powerhouse Company

Rotterdam, Netherlands

Architectural Intern, Co-op

Jan 2020 - Mar 2020

- Produced diagrams and architectural renderings using SketchUp, V-Ray, and Illustrator for a highly sustainable office building

University of Waterloo, Buoyant Foundation Project

Cambridge, ON

Research Project Coordinator, Part Time

Sep 2023 - May 2025

- Coordinated a flood resilience research project, managing a team of undergraduate researchers and overseeing project planning, schedules, budget, and documentation
- Facilitated research and stakeholder engagement, including translating technical research into communications to community partner
